

Soaring Eagle CONSULTING

What is Soaring Eagle Flight Center?

Flight Center is Soaring Eagle Consulting's database health portal a Database Analysis and Monitoring Service (SAAS)

Benefits of Soaring Eagle's Flight Center

- See the health of your servers from **any** mobile web browser
- Gathers and analyzes historical capacity data to pro-actively plan for growth
- Gathers and analyzes performance data
- Accepts "tickets" by email
- Tracks events and tasks
- Creates emergency alerts and calls
- You can set thresholds so you can act before space or other issues become critical
- You decide what level of software and support services you need

The dashboard screenshot displays several key components:

- Navigation:** Summary, File Space Trends, DB Space Trends, Drive Space Trends.
- Report Title:** CURRENT SUMMARY REPORT 10/1/2015
- Top 10 Largest Databases:** A pie chart showing the distribution of database sizes across various servers.
- Drive Space:** A bar chart comparing 'User' (green) and 'Max' (red) usage across drives C:, E:, F:, G:, H:, I:, J:, and L:.
- Create Event Form:** A sidebar form with fields for Client, Server Group, Servers, Type, Priority, Status, Assigned To (Penny Garbus), Start Date, and Due Date.
- Server Environment Page Summary:** A table listing various servers (Server 1-4, Dev, Prod, Sandbox, Oracle) with their respective health and status indicators.
