

Soaring Eagle CONSULTING

What is Soaring Eagle Flight Center?

Flight Center is Soaring Eagle Consulting's database health portal a Database Analysis and Monitoring Service (SAAS)

Benefits of Soaring Eagle's Flight Center

- See the health of your servers from **any** mobile web browser
- Gathers and analyzes historical capacity data to pro-actively plan for growth
- Gathers and analyzes performance data
- Tracks events and tasks, which can be followed by email
- Creates emergency alerts and calls
- You can set thresholds so you can act before space or other issues become critical
- Cost per server, one user \$50.00 per month
- Consulting service hours can be included for an extra fee

The image displays three screenshots of the Soaring Eagle Flight Center web application. The top screenshot shows the 'Create a New Event' form with fields for Name, Description, Notes, Client, Server Group, Server, and Type. The middle screenshot shows the 'CURRENT SUMMARY REPORT 10/1/2015' which includes a pie chart titled 'Top 10 Largest Databases' and a bar chart titled 'Drive Space' showing usage and maximum capacity for drives C:, E:, F:, G:, H:, I:, J:, and L:.
