

SharePoint Hosting Pioneer™

fpweb.net

over 1,000,000 users worldwide

Hosted vs. On-Premise SharePoint:

Free yourself from the chains of SharePoint management.

Today, organizations are changing their IT strategy & server technology. The cost of servers, data security, capacity planning, unpredictable budgets and cost of technical talent can be painful.

Today, there is a new & better way - SharePoint as a service from Fpweb.net.

- ✓ **Complete** SharePoint Server control.
- ✓ **Secure** VPN tunnels & Active Directory integration.
- ✓ **Save 60%** compared to in-house SharePoint deployments.

No more up-front costs and huge capital outlays.

Research by Gartner, Forrester and CIO magazine show that companies can lower the total cost of infrastructure ownership 25-60% with managed hosting. For most businesses, savings like this - combined with predictable monthly costs - are monumental advantages in today's economy.

No need to sacrifice security and control.

With hosted SharePoint from Fpweb.net, you enjoy a predictable monthly cost without sacrificing the scalability and security your unique situation demands. Break free to reclaim precious time to innovate and focus on your core business while we handle the intricacies of SharePoint.

SharePoint 2010 Ready.

Pioneering yet again with SharePoint 2010 research.

Microsoft is counting on us to pioneer the hosted SharePoint 2010 offering. They know we've been blazing the trails of SharePoint hosting since 1999 and have asked us to reprise our role as leader.

Microsoft trusts our experts, shouldn't you?

Our engineers are leading the way for SharePoint 2010 research. Microsoft knew who to call on to Pioneer SharePoint 2010 hosting - Who will you call?

Is your IT team ready for the complexity of 2010?

Why burden your in-house IT crew with something as complicated as a 2010 deployment when we're already masters on the subject? Our unmatched expertise will get you up and running on 2010 in days, not months.

Every bit SharePoint.

All SharePoint, all the time.

Focus, passion & pride.

When someone has a rare medical condition, they don't see their family physician; **they seek out a specialist.** They want someone who works with that condition every day; a pioneer - **a trusted leader in their field.**

The way we see it, SharePoint hosting is no different.

SharePoint is a unique, complex and powerful tool. Our entire company is 100% focused on SharePoint and the accompanying technologies that enhance it. Every solution from Fpweb.net comes standard with passion and pride, furthering our singular goal to do whatever it takes to be the best at providing hosted SharePoint services.

The SharePoint Hosting Pioneer™

In 1999 we were the first and only company in the World to host SharePoint. Now, over a decade later, with more than 1,000,000 users in over 80 countries, we're still unmatched in SharePoint and MOSS hosting expertise.

So much more than hosting

Fpweb.net's exclusive SharePoint apps & expert SharePoint consultants are here to help you take your SharePoint Server deployment to the next level. Our level of expertise and array of service offerings are simply unparalleled.

Better than BPOS.

Full server control comes standard

Custom design & development? No problem.
3rd party webparts & apps? No problem.
Explore the possibilities with a server all your own.

AD integration & public facing deployments

Easily manage your WWW SharePoint site with less risk. We can securely connect your existing network for single sign-on and seamless access.

Flexible user licensing

If you are a Microsoft Partner or have a Microsoft EA, your licensing is covered. If not, we can provide monthly licensing for you.

Redundant SAN storage

Hosting SharePoint in the Fpweb.net cloud is extremely simple. Just tell us your user & storage requirements and we'll take care of the rest. Yes, it's that easy.

U.S. AIR FORCE

American Red Cross

Blue Cross Blue Shield

Trusted by millions in over 80 countries.

Our worldwide SharePoint network is tried and true.

Hosting on a world class network means speed, power, reliability and 100% uptime guaranteed. Our SuperFast™ network utilizes intelligent BGP routing on massive, redundant backbone pipes from Sprint, AT&T and Cogent.

Rock-solid data centers

Security & monitoring:

- ✓ ADT / A-1 automation security systems
- ✓ Biometric and card access entry systems
- ✓ Multiple checkpoints & 24/7 armed personnel

Environment & fire protection:

- ✓ Anti-static floors & multi-tier ladder rack systems
- ✓ Redundant CRAC units & humidity controls
- ✓ VESDA early warning fire detection systems
- ✓ Pre-action dry pipe sprinkler systems

Reliable power:

- ✓ Redundant UPS systems for AC power
- ✓ Redundant DC power rectifiers & battery strings
- ✓ Dual power grid from utility with static switch
- ✓ Diesel generator farm with static switch (5x15 MW)

We've seen it all.

Unmatched SharePoint experts who get it right.

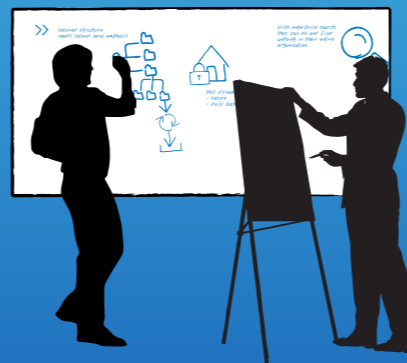

We want you to succeed. That's why every SharePoint expert at Fpweb.net takes pride in what they do. It's our relentless passion that drives us to make sure everything we do is done right.

Your very own SharePoint pit crew.

When you join our family, you're assigned an entire team of SharePoint experts who know and understand your specific solution. Our unrivaled team of SharePoint mechanics operates like a well-oiled machine, tirelessly working together until your solution is complete... The process starts with our SharePoint consultants, who architect your solution to your exact specifications. Your solution is then carefully engineered and built to spec, supported 24/7 by our systems engineers. The entire process takes place under the caring watch of Fpweb.net operations management.
