

CIRRUS Wellness Exam

ZEISS Comprehensive Widefield Report

The CIRRUS™ Wellness Exam is a simple and comprehensive OU report that shows you both macular and ONH information compared to normative data on one convenient page. It is easy to implement and allows you to grow your practice by offering patient education and value added services.

Widefield, comprehensive assessment

- Single page OU report with a 10x6 mm wide-field assessment of the posterior pole, with comparison to normative data
- Includes key macular and optic nerve head parameters: macular thickness, RNFL thickness, and GCL thickness matched to normative data
- First data-rich Wellness Exam scans set the baseline for progression analysis

Easy to implement

- One-click Wellness Exam workflow
- Use for patient education to encourage compliance

Grow your practice

- Expand your base of medical patients by aiding in identifying pathologies
- Retain patients longer by monitoring your patients' ocular health over time
- Generate revenue by offering as an optional service

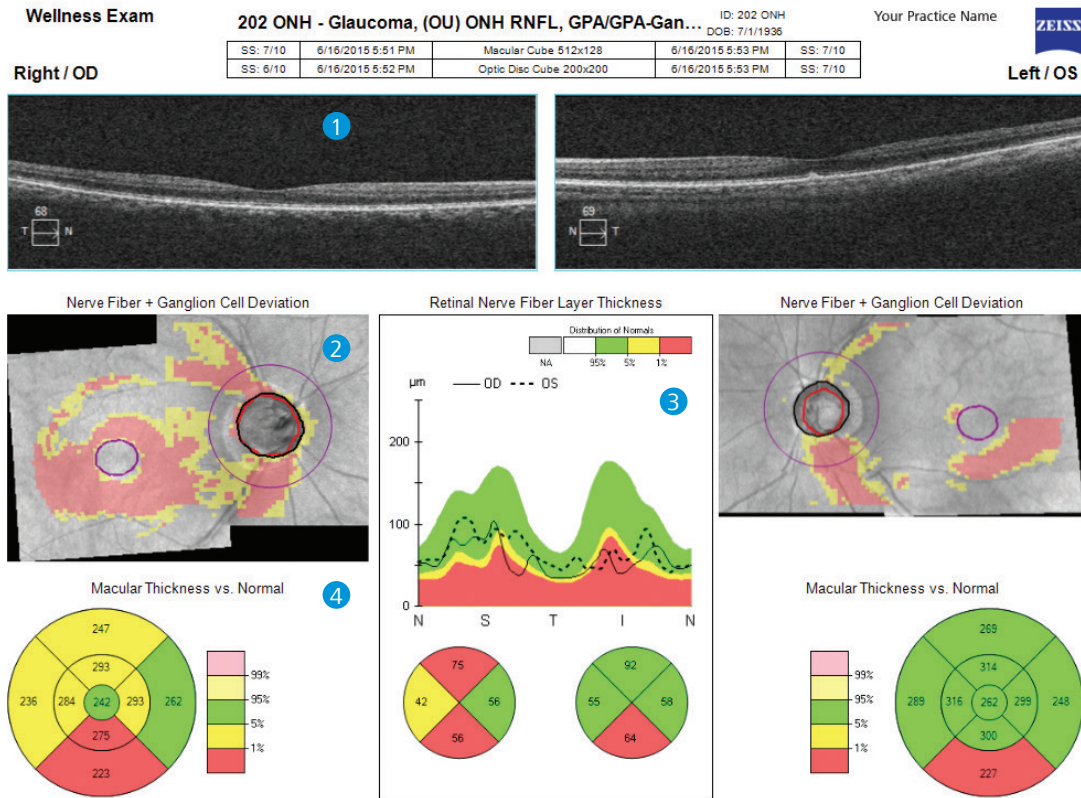

CIRRUS Wellness Exam

ZEISS Comprehensive Widefield Report

The widefield assessment of the macular and ONH compared to normative data

- 1 Scrollable horizontal B-Scan - slice number located in the lower left corner
- 2 RNFL and Ganglion Cell Deviation Map – ONH image shows boundaries of cup to disc and RNFL calculation circle
- 3 RNFL Thickness graph and quadrants – choose from TSNIT or NSTIN configurations
- 4 Macular Thickness - ETDRS grid automatically centered at the fovea

Use your Wellness Exam to set a baseline for Guided Progression Analysis™ (GPA™) and Ganglion Cell Analysis Guided Progression Analysis (GCGPA)
