

ANALYZING DATA ISN'T ROCKET SCIENCE; IT'S OLAP

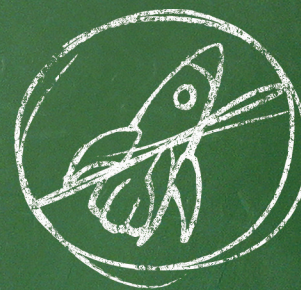

Discover new trends and drive efficiency with essential data analysis, reporting, and charting. Rather than summarizing data in spreadsheets, which can be tedious, repetitive, and error-prone, make ComponentOne OLAP™ for WinForms your business solution. This suite of .NET controls provides analytical processing features similar to those found in Microsoft Excel® Pivot Tables and Pivot Charts. With drag-and-drop views, you get real-time information, insights, and results in seconds. Choose OLAP for WinForms because data analysis shouldn't be rocket science.

SEE WHY USING OLAP FOR WINFORMS IS FUN AND GETS YOU FAST RESULTS:

- * Code-free data analysis; just drop the CIOlapPage control on the form, connect to a database, and go
- * Easy-to-use tabbed interface similar to Microsoft Excel®
- * Drag-and-drop views
- * Query builders similar to Excel's Pivot Tables
- * Reports are a click away; print and email reports
- * Data transferrable to Excel; perform additional analyses including regressions, create customized reports by annotating the data or adding custom charts
- * Supports predefined views
- * Customizable, straightforward user interface
