onShore SECURITY

Cybersecurity Leadership

Cybersecurity Leadership is a cybersecurity professional service program involving CISO responsibility, augmentation, and direction.

onShore CISO Leadership will provide a CISO to an organization and satisfy regulatory requirements at a fraction of the cost.

The core function of the CISO is to report on the cybersecurity program at least annually to the Board of Directors, including the effectiveness of the program and any material events that were addressed during the time period.

The onShore CISO will administer a program of oversight to all Cybersecurity policies, procedures, test, assessments, and reports, making recommendations and providing guidance to IT and business leadership.
