For All Encompassing System Protection and Predictability

triCerat

For system administrators who demand a better way of handling all aspects of the user environment, triCerat has the ultimate solution.

Whether your primary goal is to effectively manage and control your user workstation environment or to provide superior user personalization, Simplify Suite has something to offer everyone.

Simplify Suite provides the ability to reliably deliver desktops, control application access, help enforce policies, reduce logon times, manage personalization for large numbers of virtual desktops, and deliver the correct profile information to the right user at every logon session from any location. Simplify Suite allows users to have a highly customized, fast, and predictable desktop environment which in turn increases work productivity and overall satisfaction.

triCerat's all encompassing user environment management system gives you the technology to run an efficient, seamless business operation.

The Simplify Suite utilizes a database that can be created and controlled from any machine or location. The Simplify Console offers an all-in-one interface that allows you to streamline, automate, and optimize the most challenging aspects of TS, virtual desktop, and workstation configuration: profiles, resource management, printing, and user environments.

triCerat's complete user management tool incorporates a software framework that extends and enhances Windows 2003 and 2008 Server operating systems which boosts Windows Terminal Server performance and Citrix XenApp reliability and security as well as supporting VMware virtual desktop infrastructure (VDI) and Windows workstations.

Simplify Suite provides system administrators with increased server predictability, performance, security, and lowered support and hardware costs.

Features

- Simplify Console - an easy-to-use, centralized interface for configuring, managing, and monitoring all Suite functions.
- Auditing Control Feature
- Automatic Simplify Database Discovery
- Auto-Verification License Manager
- Comment Space
- Administrative Bookmark Menu
- Administrator Delegation Management Tool
- Customizable Panes

Benefits

- Boosts TS reliability, performance, and security
- Enhances end-user experience and productivity
- Reduces support and administration effort
- Ensures delivery of service-level commitments
- Expands capacity of existing hardware
- Eliminating extensive scripting and Group Policy edits
- Prevents users from running unauthorized .exes
- Monitors and adjusts CPU distribution and tuning memory consumption, enhancing performance

"We started this project in September 2005 with one server - 6 months later we are at 5 servers and almost 400 users. I can say without hesitation, without Simplify Suite the printer problems alone would have buried us. Aside from N0 printer issues, Simplify Suite has given us an easy method of deploying our product. I recommend your Suite to anyone deploying Terminal Services." **— Jack Hogue, WinCruise**
